ABOUT ME

I am Sanuth Newmin Rathnayaka and I am currently a third year student of software engineering at the Open University of Sri Lanka. I live in Avissawella area. Creating websites as a freelance web developer. I have three years of experience for that. I am volunteering as a web master and finance team & logistic team member of y2npro of IEEE Sri Lanka section and also serving as design team devotional manger of SEDS ousl from 2023. I am particularly interested in web design and development. It is studied more about it in the form of self study. This is the content about me.

IEEE

● PROJECTS

02/2023

Project for JMS constructions

I had the privilege of creating a dynamic and informative website for JMS Construction, a reputable construction company led by Mr. Hashan. The goal of this project was to establish a strong online presence for the client's business, showcasing their expertise, services, and contact information.

Link <https://www.sanuthnewmin.info/jmsproject.php>

ENOSPIRE web project

This website was created by the Career Guidance Unit at the Open University of Sri Lanka. For the related registration and event activities for the entrepreneurship day organized by

03/2023

Open University of Sri Lanka Job Portal

I am proud to have successfully delivered a comprehensive job portal solution for the Career Guidance Unit at the Open University of Sri Lanka. This custom WordPress-based platform was designed to streamline the university's job management processes and enhance the overall job-seeking experience for its students.

Link <https://ou.ac.lk/jobportal/>

11/2023

Agromate Web platform

Agromate, a cutting-edge website, has emerged as a revolutionary tool in the field of tea cultivation, aiming to simplify and enhance the process of identifying and managing diseases in tea plants.

The platform offers a user-friendly interface where planters can input symptoms, receive accurate diagnoses, access control measures, and obtain recommendations for fertilizers. With an intuitive design and an innovative admin dashboard for disease database management, Agromate is set to transform the way tea planters approach disease prevention and management in their plantations.
